

6 Ensure the patient is seated safely before returning the wheelchair.

7 Please use the handicap toilets instead of the regular toilets.

Please note that our wheelchairs are for patients' use within the polyclinic premises only.

Tips Safe use of wheelchairs

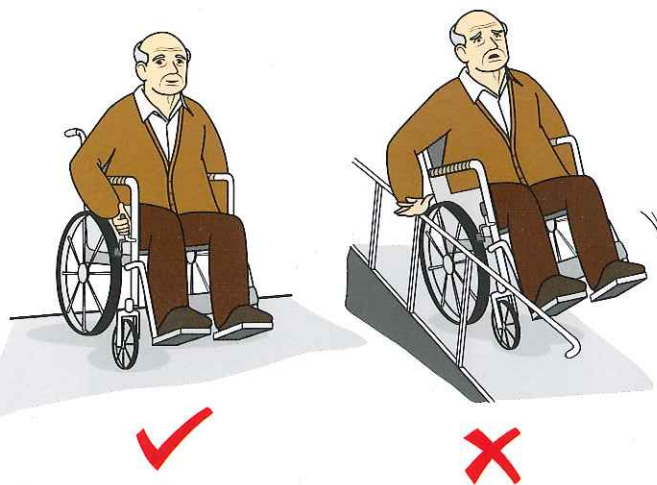

To help you use the wheelchair safely, we would like to advise you on the following:

1 Engage the brakes before transferring the patient to or from the wheelchair.

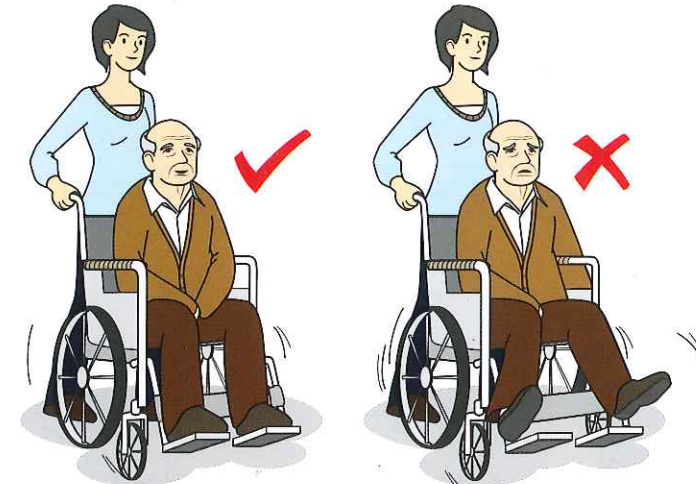

2 Do not park the wheelchair on a slope, even with the brakes on.

3 Do not park the wheelchair along busy or narrow walkways where it may obstruct the flow of traffic.

4 Ensure the patient is seated properly in the chair, with both feet on the foot rests, before moving off.

5 Do not wheel the patient over uneven ground.
